

Course : Excel: Getting Started with Application Development in VBA

optional TOSA® certification

Practical course - 4d - 28h00 - Ref. BAV

Price : 1490 € E.T.

★★★★★ 4,8 / 5

BEST

Teaching objectives

At the end of the training, the participant will be able to:

- ✓ Viewing a macro's VBA code and making simple changes in an editor
- ✓ Knowing Excel objects, their properties, and essential methods
- ✓ Using different conditional structures of the language, variables and constants, and handling errors.
- ✓ Creating input forms and creating event procedures

Practical details

Certificate

Discussions, hands-on exercises, and practice that will prepare you to take the TOSA® certification exam if you chose it as an option

Teaching methods

Active learning based on discussions, real-world exercises, and practice if taking the TOSA® certification exam, and an evaluation of what was learned from the training.

Course schedule

1 Development using macros

- Defining and identifying the limits of a macro: Need to use VBA.
- Recording a macro and displaying the code.
- Assigning a macro to a button.
- Using variable dimension ranges.

Hands-on work

Overview of the TOSA® test, and head count of participants when going around the room. Recording macros to learn about VBA code.

PARTICIPANTS

PREREQUISITES

TRAINER QUALIFICATIONS

The experts leading the training are specialists in the covered subjects. They have been approved by our instructional teams for both their professional knowledge and their teaching ability, for each course they teach. They have at least five to ten years of experience in their field and hold (or have held) decision-making positions in companies.

ASSESSMENT TERMS

The trainer evaluates each participant's academic progress throughout the training using multiple choice, scenarios, hands-on work and more.

Participants also complete a placement test before and after the course to measure the skills they've developed.

TEACHING AIDS AND TECHNICAL RESOURCES

- The main teaching aids and instructional methods used in the training are audiovisual aids, documentation and course material, hands-on application exercises and corrected exercises for practical training courses, case studies and coverage of real cases for training seminars.
- At the end of each course or seminar, ORSYS provides participants with a course evaluation questionnaire that is analysed by our instructional teams.
- A check-in sheet for each half-day of attendance is provided at the end of the training, along with a course completion certificate if the trainee attended the entire session.

2 Getting started with Excel VBA language

- Viewing a macro's code and making simple changes in an editor.
- Identifying what sets different versions of Excel apart.
- Understanding the VBA environment: Modules, projects, objects, and their properties.
- Knowing the main objects of Excel (Workbook, Worksheet, Range), their properties and essential methods.

Hands-on work

Working on variable dimension ranges. Consolidating information from multiple tabs.

3 Language structure

- Knowing conditionals: IF ...END IF, SELECT CASE. FOR NEXT, DO WHILE, UNTIL, FOR EACH NEXT loops.
- Understanding variables and constants. Documenting the code.
- Managing runtime errors, debugging.
- Working with procedures and functions. Calls, branches.

Hands-on work

Analyzing and then creating code to act conditionally on cell ranges.

4 Dialog box and forms

- Using the message box, input box. Excel dialogs.
- Defining and understanding the role of a UserForm in Excel.
- Describing a form's different objects, control properties in a form.
- Retrieving, controlling, and using data entered in the form.

Hands-on work

Creating a UserForm to use the entered data.

5 Event procedures

- Understanding the event procedure. The first workbook and sheet events (Open, Activate).
- Initializing and configuring a control: Control events in UserForm.

Hands-on work

Defining actions to be run when a workbook is opened, when a UserForm is displayed.

6 Communicating with Word or PowerPoint

- Using automation, referencing a library.
- Working with the Application object.

Hands-on work

With VBA, transfer an Excel table into a Word document or PowerPoint presentation. Optional: Certifying your skills with TOSA®.

TERMS AND DEADLINES

Registration must be completed 24 hours before the start of the training.

ACCESSIBILITY FOR PEOPLE WITH DISABILITIES

Do you need special accessibility accommodations? Contact Mrs. Fosse, Disability Manager, at psh-accueil@orsys.fr to review your request and its feasibility.

Options

Certification : 80€ HT

If registering for the TOSA® certification option, you must do so at the same time as course registration. The exam is made up of a 60-minute adaptive test with 35 exercises. The result indicates your skill level. Merely taking the course is not sufficient to achieve a maximum score. The exam is proctored by the instructor and is carried out online during the last half-hour of the course. If taking place in a remote classroom, the exam must be both scheduled and then taken online within 4 weeks following the start of your session.

Dates and locations

REMOTE CLASS

2026 : 26 May, 26 May, 9 June, 23 June, 15 Sep.,
15 Sep., 22 Sep., 13 Oct., 3 Nov., 10 Nov., 1 Dec.,
1 Dec.
