

Course : Semarchy xDI Data Integration

The high-performance Extract Transform Load
Practical course - 3d - 21h00 - Ref. SXD
Price : 2330 € E.T.

NEW

Semarchy xDI is a tool for accelerated data integration. The aim of this training course is to enable you to set up ELT-type data flows, whether to feed a datawarehouse or to process big data. You'll learn how to collect, manage data quality, store and offer web-based data access services with complete agility.

Teaching objectives

At the end of the training, the participant will be able to:

- ✓ Be able to build ELT/ETL flows with Semarchy's data integration tool
- ✓ Understand how Semarchy xDI is organized and set up in its environment
- ✓ Getting to grips with Semarchy's graphical interface under Eclipse
- ✓ Manage different data access connectors
- ✓ Exploiting data flow projects

Intended audience

Anyone in the IT department in charge of processing business intelligence or big data.

Prerequisites

Knowledge of SQL language or database data manipulation.

Practical details

Teaching methods

Active

Course schedule

PARTICIPANTS

Anyone in the IT department in charge of processing business intelligence or big data.

PREREQUISITES

Knowledge of SQL language or database data manipulation.

TRAINER QUALIFICATIONS

The experts leading the training are specialists in the covered subjects. They have been approved by our instructional teams for both their professional knowledge and their teaching ability, for each course they teach. They have at least five to ten years of experience in their field and hold (or have held) decision-making positions in companies.

ASSESSMENT TERMS

The trainer evaluates each participant's academic progress throughout the training using multiple choice, scenarios, hands-on work and more. Participants also complete a placement test before and after the course to measure the skills they've developed.

TEACHING AIDS AND TECHNICAL RESOURCES

- The main teaching aids and instructional methods used in the training are audiovisual aids, documentation and course material, hands-on application exercises and corrected exercises for practical training courses, case studies and coverage of real cases for training seminars.
- At the end of each course or seminar, ORSYS provides participants with a course evaluation questionnaire that is analysed by our instructional teams.
- A check-in sheet for each half-day of attendance is provided at the end of the training, along with a course completion certificate if the trainee attended the entire session.

1 Installation and architecture of the Semarchy xDI Data Integration solution

- Semarchy xDI organization
- Semarchy xDI and cloud computing
- How to deploy and install Semarchy Data Integration
- Advanced settings

2 Semarchy's graphical integration with Eclipse: how to get your bearings?

- Where do we stand in terms of job referencing and development?
- Workspace
- Organization of data processing projects and files within the repository
- Management of development versions and backtracking on history
- Eclipse (Java) and Semarchy xDI views

3 Management of connectors to various data sources (RDBMS, NoSQL, CSV, XML)

- Database connection and reverse (cloud on premise)
- Connecting and organizing flat-file data
- Connecting and obtaining the XML file schema

Hands-on work

Identify the various data sources and apply the appropriate connections.

4 Development of data flow projects in Semarchy xDI

- Development of data mappings from A to Z: sources, filters, joins, staging, reject management...
- Process development: links, files, variables and session variables
- Testing and execution

Hands-on work

Execute a project with full mapping and in-depth process.

5 Creation of XML-generating data flows and implementation of web services

- XML file generation with Semarchy xDI
- Interrogation of web services (HTTP Rest, SOAP)
- Creation of a middleware-type web services exhibition system

Hands-on work

Create a data flow with XML and create a web service.

6 Advanced development

- Templates
- Technologies and the associated XPath language
- Advanced processes

Hands-on work

Apply advanced workflows to a project.

TERMS AND DEADLINES

Registration must be completed 24 hours before the start of the training.

ACCESSIBILITY FOR PEOPLE WITH DISABILITIES

Do you need special accessibility accommodations? Contact Mrs. Fosse, Disability Manager, at psh-accueil@orsys.fr to review your request and its feasibility.

7 Implementation of Semarchy xDI jobs and web services from the web interface (and Stambia analytics)

- The administration panel
- Session Reports
- Packages
- Log
- Deliveries
- Running data replications
- Scheduling, automating processing

Hands-on work

Configure a project from A to Z and put it into operation.

Times

Courses take place from 09:00 to 12:30 and from 14:00 to 17:30.

Participants may arrive beginning at 08:45. Breaks and lunches are complimentary.

For four- and five-day hands-on courses, sessions end at 16:00 on the last day of the course, regardless of the teaching mode..
