Course : Professional Scrum Product Owner™ - Advanced (PSPO-A)

Scrum.org Official Training

Practical course - 2d - 14h00 - Ref. SCQ

With this training course, you will develop your advanced Product Owner skills by exploring the key postures of the role (visionary, collaborator, influencer, etc.) to maximize the value delivered, refine your product leadership and better collaborate with stakeholders. Aimed at experienced POs and PMs, this course includes practical exercises and a PSPO II certification.

Teaching objectives

At the end of the training, the participant will be able to:

- Discover the different postures a Product Owner adopts to meet day-to-day challenges
- Explore modern complementary practices through discussions, case studies and exercises
- Acquire a clear understanding of Agile Product Management to progress in your role as Product Owner
- Identify the types of Product Owner stakeholders and learn how to collaborate effectively with each of them

Intended audience

Scrum-savvy Product Owners, Product Managers and Business Analysts, as well as Scrum Masters, agile coaches and executives wishing to deepen their understanding of Product Management.

Prerequisites

Advanced experience in Product Ownership or Product Management, ideally PSPO certified (Scrum.org).

Certification

All participants who have completed the Professional Scrum Product Owner - Advanced (PSPO-A) course will receive a password enabling them to take the Professional Scrum Product Owner II (PSPO II) assessment. This industry-recognized certification requires a minimum score of 85%. Participants who take the assessment within 14 days of receiving their free password and fail to achieve 85% will receive a free second attempt. Scrum.org training participants can earn PDU (Professional Development Units) credits from the Project Management Institute (PMI): 14 PDUs are awarded after completing the two-day Professional Scrum Product Owner - Advanced (PSPO-A) training course.

Comment passer votre examen ?

Practical details

Participants will try out each of the advanced postures of the product owner through a case study.

Teaching methods

Training in French. Official course material in digital format and in English. Good understanding of written English.

Course schedule

1 **Customer Representative**

- Understand customer problems, pains and opportunities.
- Put yourself in the customer's shoes, understand their needs.
- Link product features to customer results.

2 **Le Visionnaire (Visionary)**

- Provide a vision of the future state, possibilities, objectives and opportunities.
- Communicate product vision, strategy and objectives.
