PARTICIPANTS

PREREQUISITES

TRAINER QUALIFICATIONS

The experts leading the training are specialists in the covered subjects. They have been approved by our instructional teams for both their professional knowledge and their teaching ability, for each course they teach. They have at least five to ten years of experience in their field and hold (or have held) decision-making positions in companies.

ASSESSMENT TERMS

The trainer evaluates each participant's academic progress throughout the training using multiple choice, scenarios, hands-on work and more.

Participants also complete a placement test before and after the course to measure the skills they've developed.

TEACHING AIDS AND TECHNICAL RESOURCES

- The main teaching aids and instructional methods used in the training are audiovisual aids, documentation and course material, hands-on application exercises and corrected exercises for practical training courses, case studies and coverage of real cases for training seminars.
- At the end of each course or seminar, ORSYS provides participants with a course evaluation questionnaire that is analysed by our instructional teams.
- A check-in sheet for each half-day of attendance is provided at the end of the training, along with a course completion certificate if the trainee attended the entire session.

3 » Selecting service applications and connections

- Overview of service applications
- Setting up and configuring the service applications.
- Configuring the app catalog.
- Configuring the external functions and the hybrid environment.
- Hands-on work »Configuring basic service applications. Configuring the external services and the app catalog.

4 » Setting up search functions

- Overview of functions.
- Configuring search services
- Improvement through taxonomy.
- Links and settings for searching in a site collection.
- Hands-on work »Configuring a global search of a SharePoint farm. Links and settings for a search site collection.

5 » Managing users and security

- Setting up user profile services.
- Managing profiles and audiences.
- Global security strategies.
- Configuring security for an extranet.
- Hands-on work »Synchronizing users with Active Directory. Setting up FBA authentication for an extranet.

6 » Troubleshooting and monitoring

- Monitor a SharePoint environment.
- Settings and optimizations.
- Backup methods.
- Problem-solving.
- Hands-on work »Backing up a site collection. Analysis method for problem-solving.

TERMS AND DEADLINES

Registration must be completed 24 hours before the start of the training.
