

Course : Writing targeted transmissions

Practical course - 2d - 14h00 - Ref. SMC

Price : 940 € E.T.

★★★★☆ 4,8 / 5

Targeted transmissions promote patient care, while meeting the requirements of continuity of care and traceability of nursing acts. This training course will enable participants to organize this part of the care file by establishing a common language for all those involved.

Teaching objectives

At the end of the training, the participant will be able to:

- ✓ Understanding the importance of targeted transmissions in the quality of care
- ✓ Combining clinical reasoning, the diagnostic approach and written communications
- ✓ Apply the methodology of targeted transmissions as a reflection and tool of the care approach
- ✓ Affirming, through targeted transmissions, the specificity of caregivers in the multidisciplinary team
- ✓ Communicate with a common, precise and rigorous vocabulary
- ✓ Meeting legislative requirements: liability, traceability

Intended audience

Healthcare staff and any other paramedical professionals concerned.

Prerequisites

No special knowledge required.

Practical details

Hands-on work

Pedagogical approach complemented by a practice analysis activity.

Course schedule

PARTICIPANTS

Healthcare staff and any other paramedical professionals concerned.

PREREQUISITES

No special knowledge required.

TRAINER QUALIFICATIONS

The experts leading the training are specialists in the covered subjects. They have been approved by our instructional teams for both their professional knowledge and their teaching ability, for each course they teach. They have at least five to ten years of experience in their field and hold (or have held) decision-making positions in companies.

ASSESSMENT TERMS

The trainer evaluates each participant's academic progress throughout the training using multiple choice, scenarios, hands-on work and more. Participants also complete a placement test before and after the course to measure the skills they've developed.

1 Setting the general framework for targeted transmissions

- Understand the clinical areas of nursing practice where CT is applied.
- See how CTs fit into the care process.
- Understand the link between CT, quality of care criteria and the quality approach.
- Know the legal framework of the care file.

Storyboarding workshops

Discussions on the gap between expected models and the reality of nursing practice.

2 Understanding the methodology of targeted transmissions

- Understand what macro-targeting means.
- Distinguish between dominant and event-driven targets.
- Respect the levels of the targeted transmission methodology: data, action and result.
- Draw up the activity diagram.
- Use wall planning.

Demonstration

Using clinical situations to illustrate each of the points covered.

3 Developing taxonomy as a professional language

- Draw up a catalog of defined situations, propose actions to be implemented.
- Linking target taxonomy and nursing diagnosis.
- Know the different ways of classifying care situations according to specific criteria.
- Identify the different models: basic needs model, everyday actions model, etc.
- Understand the pedagogical value of the approach.

Exercise

Distinction between macro-target, target, data, results...

4 Preparing targeted transmission media

- Define specific care objectives.
- List recurring, dominant targets.
- Create an activity grid.
- Identify frequently encountered difficulties and suggest relevant terminologies.

Hands-on work

Based on situations provided by participants, development of support materials.

TEACHING AIDS AND TECHNICAL RESOURCES

- The main teaching aids and instructional methods used in the training are audiovisual aids, documentation and course material, hands-on application exercises and corrected exercises for practical training courses, case studies and coverage of real cases for training seminars.
- At the end of each course or seminar, ORSYS provides participants with a course evaluation questionnaire that is analysed by our instructional teams.
- A check-in sheet for each half-day of attendance is provided at the end of the training, along with a course completion certificate if the trainee attended the entire session.

TERMS AND DEADLINES

Registration must be completed 24 hours before the start of the training.

ACCESSIBILITY FOR PEOPLE WITH DISABILITIES

Do you need special accessibility accommodations? Contact Mrs. Fosse, Disability Manager, at psh-accueil@orsys.fr to review your request and its feasibility.

5 Understanding the relationship between written and oral communications

- Use the activity diagram: vertical and horizontal reading.
- Communicate using a precise, concise and rigorous vocabulary.
- Discern what is useful to write and what is not.

Exercise

Case-based exercises.
