

Course : SCOM 2012, systems supervision

Practical course - 5d - 35h00 - Ref. SUE

Price : 2710 € E.T.

Implement and administer System Center Operations Manager 2012 (SCOM) with this training course, to monitor your servers and guarantee higher availability. In particular, you'll learn how to implement significant alert escalation and improve system performance.

Teaching objectives

At the end of the training, the participant will be able to:

- ✓ Install and configure System Center Operations Manager (SCOM) 2012
- ✓ Configuring client monitoring
- ✓ Create a customized report
- ✓ Backing up and restoring System Center Operations Manager

Intended audience

Systems and network technicians, administrators and engineers.

Prerequisites

Very good knowledge of the Windows Server environment (Active Directory and TCP/IP).

Course schedule

1 Architecture and implementation

- The SCOM 2012 ecosystem.
- Architecture roles. Resource pools.

Hands-on work

Installation of prerequisites, Stand Alone infrastructure.

PARTICIPANTS

Systems and network technicians, administrators and engineers.

PREREQUISITES

Very good knowledge of the Windows Server environment (Active Directory and TCP/IP).

TRAINER QUALIFICATIONS

The experts leading the training are specialists in the covered subjects. They have been approved by our instructional teams for both their professional knowledge and their teaching ability, for each course they teach. They have at least five to ten years of experience in their field and hold (or have held) decision-making positions in companies.

ASSESSMENT TERMS

The trainer evaluates each participant's academic progress throughout the training using multiple choice, scenarios, hands-on work and more.

Participants also complete a placement test before and after the course to measure the skills they've developed.

2 Configuration

- Administration group: configuration parameters.
- Interfaces. Views and dashboards.
- Access management.

Hands-on work

Configuration of alerts, database cleanup, notifications. Install operation console, Web console. Access management and view creation.

3 Deploying the supervisory agent

- Active Directory Integration.
- Extensive, manual installation.
- Management of supervisory agents.

Hands-on work

Implement Active Directory Integration functionality.

4 Administration packs

- Importing and exporting.
- Extension of supervision/Authoring.
- How to seal administration packs?
- Run As Accounts/profil.

Hands-on work

Import and export an administration pack. Supervision extension.

5 The reports

- SQL Server Reporting Services (SSRS), Report Server.
- Methodology for creating customized reports.

Hands-on work

Configuring SQL Reporting Services. Install Report Server. Create a custom report.

6 Modeling your services

- Synthetic transactions.
- Distributed applications.
- Measuring service quality.

Hands-on work

Create synthetic transactions and a distributed application.

7 Supervision of SNMP devices and non-Windows systems

- SNMP, basic and advanced supervision.
- Supervision of non-Windows systems.

Hands-on work

Discover and supervise SNMP devices and Linux servers.

TEACHING AIDS AND TECHNICAL RESOURCES

- The main teaching aids and instructional methods used in the training are audiovisual aids, documentation and course material, hands-on application exercises and corrected exercises for practical training courses, case studies and coverage of real cases for training seminars.
- At the end of each course or seminar, ORSYS provides participants with a course evaluation questionnaire that is analysed by our instructional teams.
- A check-in sheet for each half-day of attendance is provided at the end of the training, along with a course completion certificate if the trainee attended the entire session.

TERMS AND DEADLINES

Registration must be completed 24 hours before the start of the training.

ACCESSIBILITY FOR PEOPLE WITH DISABILITIES

Do you need special accessibility accommodations? Contact Mrs. Fosse, Disability Manager, at psh-accueil@orsys.fr to review your request and its feasibility.

8 Supplements

- Backup and restore planning.
- The Agentless Exception Monitoring (AEM) function.
- Supervision of resources in unapproved environments (DMZ/Workgroup).
- .NET application monitoring (APM).
- Migration from SCOM 2007 to 2012.
