Digital activities

By Reality Academy training courses are immersive and interactive. Learning by doing is a powerful skill-building tool: immersed in a virtual classroom, the learner selects his or her training course and plunges into the scenario. They experience a situation, make a decision in the 1st person and live the direct consequences.

Mentoring

The tutoring option offers personalized support from an ORSYS trainer who is an expert in the field. Adapted to the needs, abilities and pace of each learner, this tutoring combines asynchronous follow-up (personalized corrections of exercises, unlimited exchanges by message...) and individual synchronous exchanges. The result: better understanding, skills development and lasting commitment to training.
