

Course : Adobe Audition, mastering professional audio

Practical course - 2d - 14h00 - Ref. AAC

Price : 1380 CHF E.T.

In this specialized training course, you'll be guided through a comprehensive exploration of Adobe Audition's advanced features. You'll learn how to create professional-quality mixes, synchronize music with videos, and publish complete podcasts with ease.

Teaching objectives

At the end of the training, the participant will be able to:

- ✓ Master Adobe Audition's interface and functions
- ✓ Acquire the skills needed to record and manipulate audio tracks
- ✓ Master audio editing techniques
- ✓ Apply audio effects and make corrections
- ✓ Master techniques for mixing, adding music and sound effects
- ✓ Export your project

Intended audience

Communication managers, webmasters, journalists, and anyone responsible for setting up a communication channel through the creation of audio content.

Prerequisites

Basic knowledge of the Windows environment.

Practical details

Hands-on work

The teaching method is active and participative. It alternates knowledge input with applied exercises.

Course schedule

PARTICIPANTS

Communication managers, webmasters, journalists, and anyone responsible for setting up a communication channel through the creation of audio content.

PREREQUISITES

Basic knowledge of the Windows environment.

TRAINER QUALIFICATIONS

The experts leading the training are specialists in the covered subjects. They have been approved by our instructional teams for both their professional knowledge and their teaching ability, for each course they teach. They have at least five to ten years of experience in their field and hold (or have held) decision-making positions in companies.

ASSESSMENT TERMS

The trainer evaluates each participant's academic progress throughout the training using multiple choice, scenarios, hands-on work and more.

Participants also complete a placement test before and after the course to measure the skills they've developed.

1 Introducing Adobe Audition

- Interface presentation.
- Different display modes.
- Essential keyboard shortcuts.
- Configuration of project parameters.

Hands-on work

Create a new project and import an audio file.

2 Audio recording

- Configuration of recording parameters.
- Using the Record panel.
- Mono or stereo track recording.
- Record and manipulate multiple tracks simultaneously.
- Add markers and cues.
- Mixing audio tracks.

Hands-on work

Recording a voice-over for a podcast.

3 Audio effects

- Select and apply audio effects.
- Effect parameter settings.
- Add effects in real time.
- Automated effects.

Hands-on work

Add sound effects to an existing audio track.

4 Audio correction

- Using audio correction tools.
- Background noise suppression.
- Equalization and tone adjustment.

Hands-on work

Correct unwanted noise and improve the sound quality of a recording.

5 Loop recording, voice processing and mixing

- Loop recording.
- Creating loops and grooves.
- The use of voice processing effects.
- Transforming the voice.
- Creating a mix.
- Using mixing plug-ins.
- Audio output configuration.

Hands-on work

Record a loop and add voice processing effects.

TEACHING AIDS AND TECHNICAL RESOURCES

- The main teaching aids and instructional methods used in the training are audiovisual aids, documentation and course material, hands-on application exercises and corrected exercises for practical training courses, case studies and coverage of real cases for training seminars.
- At the end of each course or seminar, ORSYS provides participants with a course evaluation questionnaire that is analysed by our instructional teams.
- A check-in sheet for each half-day of attendance is provided at the end of the training, along with a course completion certificate if the trainee attended the entire session.

TERMS AND DEADLINES

Registration must be completed 24 hours before the start of the training.

ACCESSIBILITY FOR PEOPLE WITH DISABILITIES

Do you need special accessibility accommodations? Contact Mrs. Fosse, Disability Manager, at psh-accueil@orsys.fr to review your request and its feasibility.

6 Music management

- Import and export music files.
- The use of music processing plug-ins.
- Creating musical loops.
- The use of music processing plug-ins.
- Synchronizing music with video.

Hands-on work

Create a musical loop and synchronize it with a video.

7 Podcast format management

- Creating a podcast.
- The recording of several voices.
- The addition of music and sound effects.

Hands-on work

Create a complete podcast with several audio tracks.

8 Export and distribution

- Exporting a final mix.
- Common export formats.
- Custom export settings.
- File sharing on social networks.

Hands-on work

Export and broadcast a finalized audio file.
