

Course : Reconciling waste prevention and management with a view to the circular economy

Practical course - 2d - 14h - Ref. DCH

Price : 1650 CHF E.T.

Waste management is the ultimate step in the implementation of a circular economy strategy to offset the increasing scarcity of natural resources. This training course will enable you to validate or optimize your organization according to the prevention and management principles defined by regulations.

Teaching objectives

At the end of the training, the participant will be able to:

- ✓ Learn to manage liaison documents with waste service providers
- ✓ Leverage contractualization to ensure waste management compliance
- ✓ Understanding the implications of EPR development
- ✓ Understand the impact of France's evolving circular economy policy
- ✓ Acquire a methodology for reconciling waste prevention and management

Intended audience

Responsables QSE, services généraux, logistique. Tout acteur de l'entreprise en charge de la gestion des déchets de son service.

Prerequisites

Know the principles of regulations relating to the sorting and management of waste from economic activities. (Equivalent to training ref.GCH.)

PARTICIPANTS

Responsables QSE, services généraux, logistique. Tout acteur de l'entreprise en charge de la gestion des déchets de son service.

PREREQUISITES

Know the principles of regulations relating to the sorting and management of waste from economic activities. (Equivalent to training ref.GCH.)

TRAINER QUALIFICATIONS

The experts leading the training are specialists in the covered subjects. They have been approved by our instructional teams for both their professional knowledge and their teaching ability, for each course they teach. They have at least five to ten years of experience in their field and hold (or have held) decision-making positions in companies.

ASSESSMENT TERMS

The trainer evaluates each participant's academic progress throughout the training using multiple choice, scenarios, hands-on work and more.

Participants also complete a placement test before and after the course to measure the skills they've developed.

Practical details

Hands-on work

Quizzes. Case studies. Collective reflection. Directed exchanges. Co-construction of tools. Create your own roadmap.

Teaching methods

Methodological input. Active and participative pedagogy. Exercises based on documents provided by participants (contracts, traceability documents, waste register).

Course schedule

1 Validating fundamentals in a fast-changing environment

- A reminder of the basics.
- Ensure common terminology and language.

Exercise

Evaluation quiz with debriefing by the instructor.

2 Manage liaison documents with waste service providers

- Acquire a methodology for coding waste according to the European nomenclature.
- Learn about the range of official waste management documents.
- Understand the circuit followed by a Bordereau de Suivi de Déchets Dangereux (BSDD).
- Learn about cross-border transfer procedures.

Case study

Deciphering a selection of liaison documents proposed by the trainer or learners.

3 Guaranteeing compliance in waste management

- Identify the proofs of compliance required from players in the management chain.
- Take stock of the points to watch out for when using subcontractors.
- Learn about roles and responsibilities when working on buildings.
- Rely on looping with the keeping of a chronological waste register.

Hands-on work

Co-construction of a contract analysis checklist.

4 Understanding the impact of EPR development

Group discussion

Identify the limits and opportunities of using EPR channels according to your activity.

TEACHING AIDS AND TECHNICAL RESOURCES

- The main teaching aids and instructional methods used in the training are audiovisual aids, documentation and course material, hands-on application exercises and corrected exercises for practical training courses, case studies and coverage of real cases for training seminars.
- At the end of each course or seminar, ORSYS provides participants with a course evaluation questionnaire that is analysed by our instructional teams.
- A check-in sheet for each half-day of attendance is provided at the end of the training, along with a course completion certificate if the trainee attended the entire session.

TERMS AND DEADLINES

Registration must be completed 24 hours before the start of the training.

ACCESSIBILITY FOR PEOPLE WITH DISABILITIES

Do you need special accessibility accommodations? Contact Mrs. Fosse, Disability Manager, at psh-accueil@orsys.fr to review your request and its feasibility.

5 Integrating circular economy requirements

- Understand the 7 pillars of the circular economy according to ADEME.
- Translate principles into actions and make the link with waste production and management.
- Review the requirements of the Circular Economy Roadmap.

Group discussion

Assess your organization's level of maturity.

6 Acquire a methodology for reconciling waste prevention and management

- Know the principles of "waste analysis".
- Identify diagnostic points of attention from a lifecycle perspective.
- Identify the arguments in favor of waste prevention.
- Know how to find technical and financial assistance to optimize waste management.

Hands-on work

Building a roadmap.
