

Course : Mastering the ZAN objective through urban planning documents

Zero-net-artificialization (ZAN), create your own land strategy
Practical course - 3d - 21h00 - Ref. URC
Price : 1960 CHF E.T.

Understand the practical and strategic dimensions of the ZAN approach. Identify long-term economic and land issues. Master the legislative process and the legal status of ZAN in the French urban planning code. Know how to mobilize levers to achieve ZAN.

Teaching objectives

At the end of the training, the participant will be able to:

- ✓ The legal and legislative framework for ZAN: issues, objectives, problems and deadlines
- ✓ Clarify the terminologies used
- ✓ Identify the levers of action and tools available to EPCIs and municipalities for sustainable urban development.
- ✓ Give a reasoned opinion on urban planning documents
- ✓ Analyze the financial and technical capacities of municipalities for urban renewal.
- ✓ Enable coordination between urban planning documents and those of local authorities with a view to achieving ZAN.

Intended audience

Agents working on the Territorial Balance theme, local development service.

Prerequisites

Knowledge of Zero Net Artificialization regulations.

Practical details

Hands-on work

Theoretical input and practical work

Teaching methods

active teaching

Course schedule

PARTICIPANTS

Agents working on the Territorial Balance theme, local development service.

PREREQUISITES

Knowledge of Zero Net Artificialization regulations.

TRAINER QUALIFICATIONS

The experts leading the training are specialists in the covered subjects. They have been approved by our instructional teams for both their professional knowledge and their teaching ability, for each course they teach. They have at least five to ten years of experience in their field and hold (or have held) decision-making positions in companies.

ASSESSMENT TERMS

The trainer evaluates each participant's academic progress throughout the training using multiple choice, scenarios, hands-on work and more. Participants also complete a placement test before and after the course to measure the skills they've developed.

1 Mastering the challenges of land sobriety

- The challenges of combating soil artificialisation.
- Clarification of the main concepts and vocabulary related to ZAN.
- The consequences of artificialization.
- Findings and trends over the last few decades in France.
- The main factors behind artificialization.

Storyboarding workshops

Theoretical and informative contributions followed by exchanges and collective sharing on the various points covered.

2 Move towards Zero Net Artificialization by 2050.

- What is ZAN? Legal framework and technical approach.
- Progressive implementation schedule.
- The ZAN players.
- Interpret urban planning documents.
- The territoriality of issues.
- Identification of the main levers and tools that can be mobilized by territories.

Case study

Based on the information provided, reconstruct development scenarios and estimate densification potential and the possible need for extension.

3 Integrating land issues into urban planning documents

- A reminder of the general principles of the French Planning Code.
- Analysis and details of the ZAN integration scheme in urban planning documents (SRADDET-SCOT-PLU(i)).
- Identify how land issues are dealt with in the various parts of a SCOT and PLU(i).
- The posture and points of vigilance to be specified as part of the development partnership project (PPA).

Group discussion

Sharing of participants' experiences structured around theoretical input.

4 Reaching ZAN: a land strategy adapted to urban projects.

- Land strategy as the main tool to be mobilized.
- Land diagnostics and potential analysis to assess the technical, legal and financial feasibility of a project.
- The choice of land management and usage management tools according to needs.
- Points to consider before undertaking an urban renewal or renaturalization project.
- Action levers to support local authorities in their efforts to promote ZAN.

Group discussion

Theoretical contributions will be illustrated by local examples, and participants will share their experiences.

TEACHING AIDS AND TECHNICAL RESOURCES

- The main teaching aids and instructional methods used in the training are audiovisual aids, documentation and course material, hands-on application exercises and corrected exercises for practical training courses, case studies and coverage of real cases for training seminars.
- At the end of each course or seminar, ORSYS provides participants with a course evaluation questionnaire that is analysed by our instructional teams.
- A check-in sheet for each half-day of attendance is provided at the end of the training, along with a course completion certificate if the trainee attended the entire session.

TERMS AND DEADLINES

Registration must be completed 24 hours before the start of the training.

ACCESSIBILITY FOR PEOPLE WITH DISABILITIES

Do you need special accessibility accommodations? Contact Mrs. Fosse, Disability Manager, at psh-accueil@orsys.fr to review your request and its feasibility.

REMOTE CLASS
