

Course : Security for mobile devices and applications, overview

Synthesis course - 1d - 7h00 - Ref. SPM

Price : 850 € E.T.

4,4 / 5

As mobile devices become an increasingly integral part of our working environment and projects, they are creating new security challenges. This seminar provides an overview of the security issues posed by these devices: communication, data storage, application publication...

Teaching objectives

At the end of the training, the participant will be able to:

- ✓ Identify security services for mobile operating systems
- ✓ Defining safety rules for mobile project management
- ✓ Differentiating security solutions by terminal
- ✓ Define the criteria for choosing an MDM solution
- ✓ Identifying the impact of BYOD on security

Intended audience

Project managers, developers, decision-makers, marketers and anyone who needs a clear, concise overview of mobile device and application security.

Prerequisites

No special knowledge required.

Course schedule

1 Terminals

- Presentation and specific features of cell phones and tablets.
- Systems (iOS, Android, BlackBerry): architectures, configuration, data, network and application security.
- Code signing. Memory protection.
- Browsers, user-agent application and sandbox.
- Sandbox applications.
- USB connection. Data recovery, SSH access. Limits and risks.

PARTICIPANTS

Project managers, developers, decision-makers, marketers and anyone who needs a clear, concise overview of mobile device and application security.

PREREQUISITES

No special knowledge required.

TRAINER QUALIFICATIONS

The experts leading the training are specialists in the covered subjects. They have been approved by our instructional teams for both their professional knowledge and their teaching ability, for each course they teach. They have at least five to ten years of experience in their field and hold (or have held) decision-making positions in companies.

ASSESSMENT TERMS

The trainer evaluates each participant's academic progress throughout the training using multiple choice, scenarios, hands-on work and more. Participants also complete a placement test before and after the course to measure the skills they've developed.

2 Bring Your Own Device - BYOD and Mobile Device Management

- Issues surrounding BYOD, CYOD, COPE, BYOA.
- Challenges of BYOD (security, productivity, financial...). Initial feedback.
- The problem of our private professional data.
- Virtualization solutions (vmWare, Citrix, Hyper-V Client), Desktops as a Service.
- Mobile Device Management : Presentation of market solutions (AirWatch, MobileIron...). Apple iPhone configuration.
- MDM solution selection criteria (software, security, asset management).
- MDM: presentation of solutions from Microsoft, Samsung Knox and Blackberry.

3 Safety criteria

- Presentation of risks according to OWASP (GoatDroid, IOS Project).
- Storage of business data, sessions, authentication (memory, SD, FS, keychain, etc.).
- Understanding Android Root, Jailbreaking.
- Server exchange protocols.
- Impact of SQL and XSS injections in in-App and SMS applications.
- Solutions for authentication, authorization and biometrics.
- Encryption solutions (data, filesystem), terminal backup and restoration.
- Antivirus, antiphishing.

4 Developing an application in a store

- Publication rules AppStore, Google Play. Alternative stores, corporate stores.
- Apple publication certificates, provision files, certificates.
- Google License LVL.
- Application IPA, APK, disassembly.
- Impact of libraries and frameworks on application security.
- Remote content management and control.
- How do I test an application?
- Notification: outsourcing, spam risk, mechanisms.

TEACHING AIDS AND TECHNICAL RESOURCES

- The main teaching aids and instructional methods used in the training are audiovisual aids, documentation and course material, hands-on application exercises and corrected exercises for practical training courses, case studies and coverage of real cases for training seminars.
- At the end of each course or seminar, ORSYS provides participants with a course evaluation questionnaire that is analysed by our instructional teams.
- A check-in sheet for each half-day of attendance is provided at the end of the training, along with a course completion certificate if the trainee attended the entire session.

TERMS AND DEADLINES

Registration must be completed 24 hours before the start of the training.

ACCESSIBILITY FOR PEOPLE WITH DISABILITIES

Do you need special accessibility accommodations? Contact Mrs. Fosse, Disability Manager, at psh-accueil@orsys.fr to review your request and its feasibility.
