Course : IBM Spectrum Protect version 8.1.12 Implementation and Administration

IBM Spectrum Protect implementation, configuration and administration

Practical course - 5d - 35h00 - Ref. IB8
Price : 4450 € E.T.

Nouvelle édition

IBM Spectrum Protect 8.1.12 is a data backup and recovery solution designed to help you manage data retention, reduce storage costs and provide appropriate recovery point targets to meet any service level agreement. This course will focus on the basic implementation and administration of an IBM Spectrum Protect environment. Practical work is carried out on a Windows 2016 environment. Course material includes examples of AIX and Linux commands, where these differ from Windows.

Teaching objectives

At the end of the training, the participant will be able to:

- Describe the purpose of IBM Spectrum Protect
- Install and configure IBM Spectrum Protect components
- Use administration and client interfaces
- Describe storage methodology options and create a storage pool
- Customize data movement and retention policies to meet business needs
- Configure IBM Spectrum Protect database and storage pools for protection
- Optimize client configuration
- Perform backup, restore, archive and recovery operations
- Organize daily tasks to protect the IBM Spectrum Protect environment
- Automate and monitor customer and administration tasks and events

Intended audience
Implementers and administrators new to IBM Spectrum Protect data management.

PARTICIPANTS
Implementers and administrators new to IBM Spectrum Protect data management.

PREREQUISITES
Experience navigating Windows 2016. Understanding of basic concepts concerning client/server relationships.

TRAINER QUALIFICATIONS
The experts who lead the training courses are specialists in the subjects covered. They are approved by the publisher and certified for the course. They have also been validated by our teaching teams in terms of both professional knowledge and teaching skills for each course they teach. They have at least three to ten years of experience in their field and hold or have held positions of responsibility in companies.

ASSESSMENT TERMS
Assessment of targeted skills prior to training.
Assessment by the participant, at the end of the training course, of the skills acquired during the training course.
Validation by the trainer of the participant's learning outcomes, specifying the tools used: multiple-choice questions, role-playing exercises, etc.
At the end of each training course, ITTCERT provides participants with a course evaluation questionnaire, which is then analysed by our teaching teams. Participants also complete an official evaluation of the publisher.
An attendance sheet for each half-day of attendance is provided at the end of the training course, along with a certificate of completion if the participant has attended the entire session.

Prerequisites

Experience navigating Windows 2016. Understanding of basic concepts concerning client/server relationships.

Certification

Successful completion of the exam leads to IBM Certified Administrator - Spectrum Protect V8.1.12 certification.

Comment passer votre examen ?

Practical details

Teaching methods

Training in French. Official course material in digital format and in English. Good understanding of written English.

Course schedule

(1) **Module 1: Concepts and components**

(2) **Module 2: Installation and configuration**

(3) **Module 3: Interfaces and supervision**

(4) **Module 4: Storage pools and peripherals**

(5) **Module 5: Rules management, data transfer and expiration**

(6) **Module 6: Server database and storage pool management**

(7) **Module 7: Customer configuration and management**

(8) **Module 8: Customer data protection**

(9) **Module 9: Daily operations and maintenance**

(10) **Module 10: Calendars and reports**
