

Course : Microsoft Power Platform Functional Consultant (Microsoft PL-200)

Official PL-200 course, exam preparation

Practical course - 5d - 35h00 - Ref. MPV

Price : 3330 € E.T.

4,6 / 5

With this training, you will learn how to design simple applications, automations, and solutions with Microsoft Power Platform to improve business processes. You will be able to gather requirements, respond to them with tools such as Power Apps, Power Automate, and Dataverse, and collaborate with technical teams. You will configure user experiences, integrations, automations, and simple visualizations.

Teaching objectives

At the end of the training, the participant will be able to:

- ✓ Creating and customizing applications with Power Apps
- ✓ Automate processes with Power Automate
- ✓ Designing solutions using Microsoft Dataverse
- ✓ Creating simple chatbots with Power Virtual Agents
- ✓ Analyze and visualize data with Power BI
- ✓ Capture business needs and translate them into concrete solutions
- ✓ Collaborate effectively with stakeholders and technical teams

Intended audience

Functional consultants responsible for creating and configuring apps, automations and solutions, in liaison with users and technical teams.

Prerequisites

Basic knowledge of Power Platform, Microsoft 365 experience and understanding of data modeling, business logic and process automation.

Certification

Successful completion of the exam leads to certification as a "Microsoft Certified: Power Platform Functional Consultant Associate".

[Comment passer votre examen ?](#)

PARTICIPANTS

Functional consultants responsible for creating and configuring apps, automations and solutions, in liaison with users and technical teams.

PREREQUISITES

Basic knowledge of Power Platform, Microsoft 365 experience and understanding of data modeling, business logic and process automation.

TRAINER QUALIFICATIONS

The experts who lead the training courses are specialists in the subjects covered. They are approved by the publisher and certified for the course. They have also been validated by our teaching teams in terms of both professional knowledge and teaching skills for each course they teach. They have at least three to ten years of experience in their field and hold or have held positions of responsibility in companies.

ASSESSMENT TERMS

Assessment of targeted skills prior to training.

Assessment by the participant, at the end of the training course, of the skills acquired during the training course.

Validation by the trainer of the participant's learning outcomes, specifying the tools used: multiple-choice questions, role-playing exercises, etc.

At the end of each training course, ITTCERT provides participants with a course evaluation questionnaire, which is then analysed by our teaching teams. Participants also complete an official evaluation of the publisher.

An attendance sheet for each half-day of attendance is provided at the end of the training course, along with a certificate of completion if the participant has attended the entire session.

Practical details

Teaching methods

Training in French. Official course material in digital format and in English. Good understanding of written English.

Course schedule

1 Discover Microsoft Dataverse

- Create and manage environments in Dataverse.
- Create tables in Dataverse.
- Managing tables in Dataverse.
- Create and manage columns in a Dataverse table.
- Using choice lists in Dataverse.
- Import/export data and create views.
- Connect to other data in a Power Apps application.

2 Managing authorizations and administration for Dataverse

- Discover Dataverse security concepts.
- Discover Dataverse security roles.
- Use Dataverse administration options.

3 View, import and export data in Microsoft Dataverse

- Visualize data with Dataverse views.
- Use Power Query to load data into Dataverse.
