### Digital activities

By Reality Academy training courses are immersive and interactive. Learning by doing is a powerful skills-building tool: immersed in a virtual classroom, the learner selects his or her training course and plunges into the scenario. They experience a situation, make a decision in the 1st person and live the direct consequences.

### Mentoring

The tutoring option offers personalized support from an ORSYS trainer who is an expert in the field. Adapted to the needs, abilities and pace of each learner, this tutoring combines asynchronous follow-up (personalized corrections of exercises, unlimited exchanges by message...) and individual synchronous exchanges. The result: better understanding, skills development and lasting commitment to training.

### Pedagogy and practice

Get advice and feedback from leading experts. Discover their tricks of the trade and the reasons behind their successes through real-life testimonials. Learners take part in an active discovery exercise to complement and/or reinforce the expert's notional input, and benefit from feedback tailored to their response. During each course, discover operational cases created by experts to help learners put into practice what they have just learned. Find a complete and effective summary sheet! Each learner can keep a written record of what they've learned and the advice they've received.

Registration must be completed 24 hours before the start of the training.
